# **Operation**, Parts

#### DutyMax EH/GH™230/300, DH230 Hydraulic Sprayers

For professional use only. Not approved for use in explosive atmosphere or hazardous locations. For portable airless spraying of architectural paints and coatings.

*3300 psi (22.8 MPa, 228 bar) Maximum Working Pressure* See page 3 for model information, including maximum working pressure and approvals.

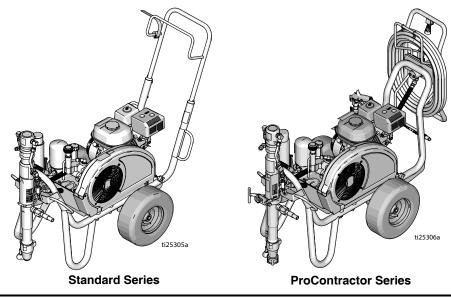

#### **Important Safety Instructions**

Read all warnings and instructions in this manual and in related manuals. Be familiar with the controls and the proper usage of the equipment. Save these instructions.

#### **Related Manuals:**

### Warnings

# Warnings

The following warnings are for the setup, use, grounding, maintenance, and repair of this equipment. The exclamation point symbol alerts you to a general warning and the hazard symbols refer to procedure-specific risks. When these symbols appear in the body of this manual or on warning labels, refer back to these Warnings. Product-specific hazard symbols and warnings not covered in this section may appear throughout the body of this manual where applicable.

#### **Electric Motor Warnings**

# **DANGER**

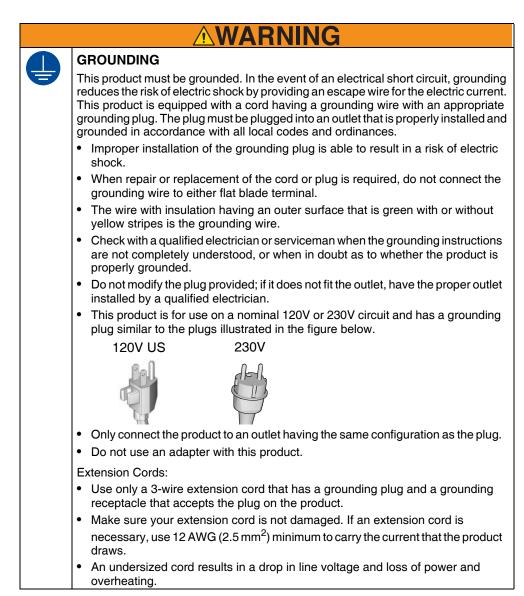

#### HIGH VOLTAGE ELECTRIC SHOCK HAZARD

This equipment uses high voltage power. Improper contact with high voltage equipment will cause death or serious injury.

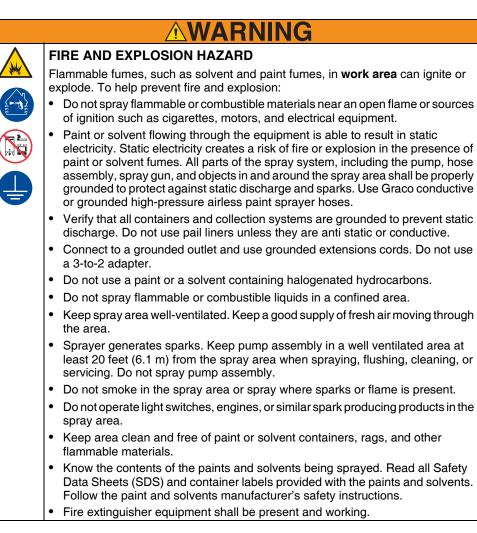

- Turn off and disconnect power cord before servicing equipment.
- This equipment must be grounded. Connect only to grounded power source.
- Use only 3-wire extension cords for 240V and single phase models.
- Use only 5-wire extension cords for 400 AC and three phase models.
- Ensure ground prongs are intact on power and extension cords.
- Do not expose to rain. Store indoors.

# Warnings

#### **Electric Motor Warnings**

#### **Internal Combustion Engine Warnings**

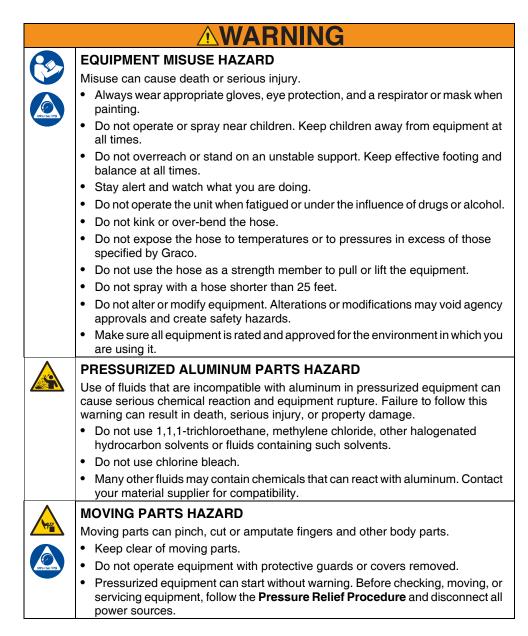

| <b>AWARNING</b>  |
|--|
| <ul> <li>FIRE AND EXPLOSION HAZARD</li> <li>Flammable fumes, such as solvent and paint fumes, in work area can ignite or explode. To help prevent fire and explosion:</li> <li>Use equipment only in well ventilated area.</li> <li>Do not fill fuel tank while engine is running or hot; shut off engine and let it cool. Fuel is flammable and can ignite or explode if spilled on hot surface.</li> <li>Eliminate all ignition sources; such as pilot lights, cigarettes, portable electric lamps, and plastic drop cloths (potential static arc).</li> <li>Keep work area free of debris, including solvent, rags and fuel.</li> <li>Do not plug or unplug power cords, or turn power or light switches on or off when flammable fumes are present.</li> </ul> |
| <ul> <li>Ground all equipment in the work area. See Grounding instructions.</li> <li>Use only grounded hoses.</li> <li>Hold gun firmly to side of grounded pail when triggering into pail. Do not use pail liners unless they are anti static or conductive.</li> <li>Stop operation immediately if static sparking occurs or you feel a shock. Do not use equipment until you identify and correct the problem.</li> <li>Keep a working fire extinguisher in the work area.</li> </ul>  |
| <ul> <li>CARBON MONOXIDE HAZARD</li> <li>Exhaust contains poisonous carbon monoxide, which is colorless and odorless.</li> <li>Breathing carbon monoxide can cause death.</li> <li>Do not operate in an enclosed area.</li> </ul>  |
| <ul> <li>BURN HAZARD</li> <li>Equipment surfaces and fluid that is heated can become very hot during operation.<br/>To avoid severe burns:</li> <li>Do not touch hot fluid or equipment.</li> </ul>  |

# Warnings

#### **Electric Motor/Internal Combustion Engine Warnings**

|         | SKIN INJECTION HAZARD  |  |
|---------|--|--|
|         | High-pressure spray is able to inject toxins into the body and cause serious bodily injury. In the event that injection occurs, <b>get immediate surgical treatment.</b>   |  |
|         | <ul> <li>Do not aim the gun at, or spray any person or animal.</li> </ul>  |  |
|         | <ul> <li>Keep hands and other body parts away from the discharge. For example, do not<br/>try to stop leaks with any part of the body.</li> </ul>  |  |
| <u></u> | • Always use the nozzle tip guard. Do not spray without nozzle tip guard in place.   |  |
|         | Use Graco nozzle tips.   |  |
|         | <ul> <li>Use caution when cleaning and changing nozzle tips. In the case where the<br/>nozzle tip clogs while spraying, follow the <b>Pressure Relief Procedure</b> for<br/>turning off the unit and relieving the pressure before removing the nozzle tip to<br/>clean.</li> </ul>                                  |  |
|         | <ul> <li>Equipment maintains pressure after power is shut off. Do not leave the<br/>equipment energized or under pressure while unattended. Follow the <b>Pressure</b><br/><b>Relief Procedure</b> when the equipment is unattended or not in use, and before<br/>servicing, cleaning, or removing parts.</li> </ul> |  |
|         | <ul> <li>Check hoses and parts for signs of damage. Replace any damaged hoses or<br/>parts.</li> </ul>   |  |
|         | <ul> <li>This system is capable of producing 3300 psi (22.8 MPa, 228 bar). Use Graco<br/>replacement parts or accessories that are rated a minimum of 3300 psi (22.8<br/>MPa, 228 bar).</li> </ul>   |  |
|         | <ul> <li>Always engage the trigger lock when not spraying. Verify the trigger lock is<br/>functioning properly.</li> </ul>   |  |
|         | <ul> <li>Verify that all connections are secure before operating the unit.</li> </ul>  |  |
|         | <ul> <li>Know how to stop the unit and bleed pressure quickly. Be thoroughly familiar<br/>with the controls.</li> </ul>  |  |

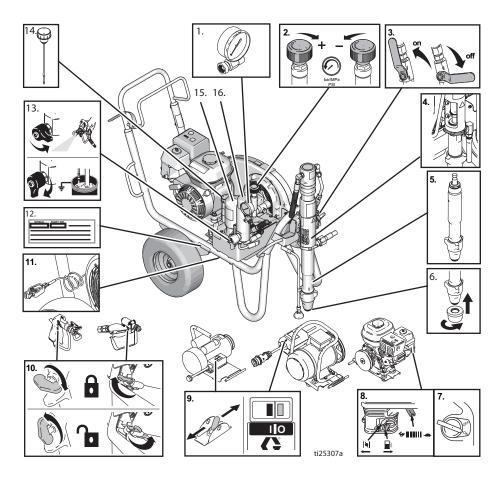

# Warnings

|                 | ENTANGLEMENT HAZARD  |
|-----------------|--|
|                 | Rotating parts can cause serious injury.   |
|                 | <ul> <li>Keep clear of moving parts.</li> </ul>  |
| MPa/bar/PSI     | <ul> <li>Do not operate equipment with protective guards or covers removed.</li> </ul>   |
|                 | • Do not wear loose clothing, jewelry or long hair while operating equipment.  |
|                 | <ul> <li>Equipment can start without warning. Before checking, moving, or servicing<br/>equipment, follow the <b>Pressure Relief Procedure</b> and disconnect all power<br/>sources.</li> </ul>                            |
|                 | TOXIC FLUID OR FUMES HAZARD  |
|                 | Toxic fluids or fumes can cause serious injury or death if splashed in the eyes or on skin, inhaled, or swallowed.   |
|                 | <ul> <li>Read SDSs to know the specific hazards of the fluids you are using.</li> </ul>  |
|                 | <ul> <li>Store hazardous fluid in approved containers, and dispose of it according to<br/>applicable guidelines.</li> </ul>  |
|                 | RECOIL HAZARD  |
| <u></u> <u></u> | Gun may recoil when triggered. If you are not standing securely, you could fall and be seriously injured.  |
| A               | PERSONAL PROTECTIVE EQUIPMENT  |
|                 | Wear appropriate protective equipment when in the work area to help prevent serious injury, including eye injury, hearing loss, inhalation of toxic fumes, and burns. Protective equipment includes but is not limited to: |
|                 | <ul> <li>Protective eyewear, and hearing protection.</li> </ul>  |
|                 | <ul> <li>Respirators, protective clothing, and gloves as recommended by the fluid and<br/>solvent manufacturer.</li> </ul>   |
|                 | CALIFORNIA PROPOSITION 65  |
|                 | The engine exhaust from this product contains a chemical known to the State of California to cause cancer, birth defects or other reproductive harm.   |
|                 | This product contains a chemical known to the State of California to cause cancer, birth defects or other reproductive harm. Wash hands after handling.  |

### Component Identification

#### **ProContractor Model (DH230)**

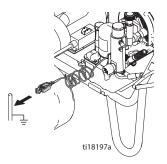

### Grounding

# Grounding

#### Grounding Procedure for Gas Engine

The equipment must be grounded to reduce the risk of static sparking. Static sparking can cause fumes to ignite or explode. Grounding provides an escape wire for the electric current.

**To ground sprayer:** Attach sprayer grounding clamp to earth ground.

Air and fluid hoses: Use only electrically conductive hoses with a maximum of 500ft. (150 m) combined hose length to ensure grounding continuity. Check electrical resistance of hoses. If total resistance to ground exceeds 29 megaohms, replace hose immediately.

**Spray gun:** Ground through connection to a properly grounded fluid hose and pump.

#### Grounding Procedure for Electric Motor

#### HIGH VOLTAGE ELECTRIC SHOCK HAZARD

This equipment uses high voltage power. Improper contact with high voltage equipment will cause death or serious injury.

- Turn off and disconnect power cord before servicing equipment.
- This equipment must be grounded. Connect only to grounded power source.
- Use only 3-wire extension cords for 240V and single phase models
- Use only 5-wire extension cords for 400 AC and three phase models.
- Ensure ground prongs are intact on power and extension cords.
- Do not expose to rain. Store indoors.
- All electrical wiring must be done by a qualified electrician and comply with all local codes and regulations.

The sprayer cord includes a grounding wire with an appropriate grounding contact.

If using the electric motor, plug must be plugged into an actual outlet that is properly installed and grounded in accordance with all local codes and ordinances.

Do not modify the plug provided; if it does not fit the outlet, have the proper outlet installed by a qualified electrician.

### Grounding

#### **Power Requirements**

- 110-120V units require 100-120 VAC, 50/60 Hz, 15A, 1 phase.
- 230V units require 230 VAC, 50/60 Hz, 16A, 1 phase
- 380-400V units require 400 VAC, 50 Hz, 16A, 3 phase, 3P+N+E, 6H power connection
- To operate the EH300DI (24W965) sprayer, the generator needs to be sized for 15 kW output (minimum).

#### **Extension Cords**

Use an extension cord with an undamaged ground contact. If an extension cord is necessary, use a 3-wire, 12 AWG (2.5 mm<sup>2</sup>) minimum.

**NOTE:** Smaller gauge or longer extension cords may reduce sprayer performance.

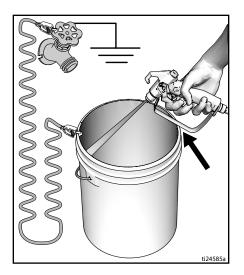

#### **Grounding of Pails**

**Solvent pails used when flushing:** Follow local code. Use only conductive metal pails, placed on a grounded surface. Do not place the pail on a non-conductive surface, such as paper or cardboard, which interrupts grounding continuity.

Always ground a metal pail: connect a ground wire to the pail. Clamp one end to the pail and the other end to a true earth ground such as a water pipe.

To maintain ground continuity when sprayer is flushed or pressure is relieved: hold metal part of spray gun firmly to the side of a grounded metal pail then trigger the gun.

#### **Circuit Protection**

Connect sprayers only to circuits which have the properly sized circuit breaker and/or fuses (for unit power requirements see **Technical Data**, pages 60-63).

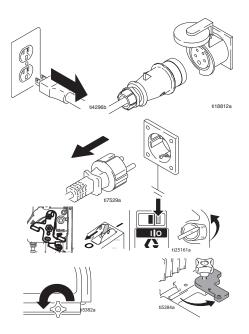

# Setup

# Setup

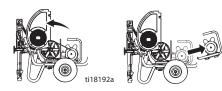

#### **Change Engine or Motor**

 Turn motor OFF and unplug or turn engine to the OFF/STOP position. Loosen belt guard knob and motor clamp. Perform **Pressure Relief Procedure**, page 15.

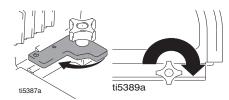

2 Lift belt guard. Remove belt. Tilt engine/motor and remove engine/motor.

3 Tilt engine/motor. Install engine/motor. Install belt. Lower belt guard.

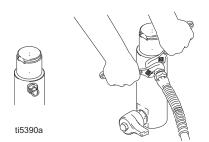

4 Swivel motor clamp. Tighten motor clamp and belt guard knob.

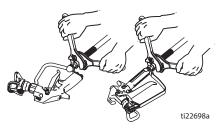

#### **Complete Setup**

1. All sprayers except ProContractor: Connect appropriate Graco high-pressure hose to sprayer.

2. Install hose to spray gun and tighten securely.

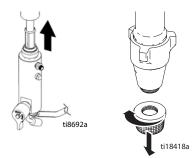

3. Engage gun trigger lock.

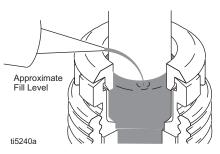

- 4. Remove Tip Guard.
- 5. **Standard Series:** Screw inlet strainer to bottom of suction hose and hand tighten securely.

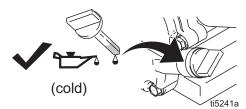

6. When spraying texture, remove inlet strainer and filter bowl screen.

7. Fill throat packing nut with TSL to prevent premature packing wear. Do this each time you spray.

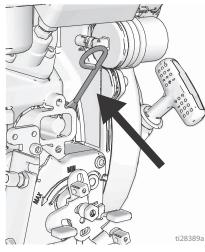

8. Check engine oil level. GASOLINE ENGINE

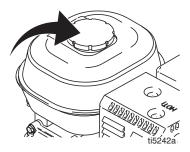

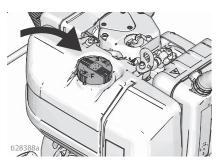

#### DIESEL ENGINE

9. Fill fuel tank. GASOLINE ENGINE

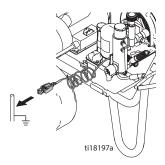

DIESEL ENGINE

10. Check hydraulic oil level. Add only Graco Hydraulic Oil, ISO Grade 46, 169236 (5 gallon/18.9 liter) or 207428 (1 gallon/3.8 liter). Hydraulic tank capacity is 1.25 gallon (4.75 liters).

11. Attach sprayer grounding clamp to earth ground.

#### **Pressure Relief Procedure**

Follow the **Pressure Relief Procedure** whenever you see this symbol.

This equipment stays pressurized until pressure is manually relieved. To help prevent serious injury from pressurized fluid, such as skin injection, splashing fluid and moving parts, follow the **Pressure Relief Procedure** when you stop spraying and before cleaning, checking, or servicing the equipment.

- 1. Engage trigger lock.
- 2. Turn sprayer OFF:
  - Turn gas engine or electric motor ON/OFF switch to OFF.

OR

- Move Diesel throttle lever to STOP.
   OR
- Unplug power cord to electric motor.
- 3. Move pump valve to OFF and turn pressure control knob fully counterclockwise to lowest setting.
- Disengage trigger lock. Hold metal part of gun firmly to side of grounded metal pail, and trigger gun to relieve pressure.
- 5. Engage gun trigger lock.
- Turn prime valve down to DRAIN position. Leave prime valve down until ready to spray again.
- If you suspect the spray tip or hose is clogged or that pressure has not been fully relieved:
  - a. VERY SLOWLY loosen tip guard retaining nut or hose end coupling to relieve pressure gradually.
  - b. Loosen nut or coupling completely.

Clear hose or tip obstruction.

# Startup (Internal Combustion Models)

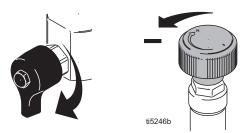

# Startup (Internal Combustion Models)

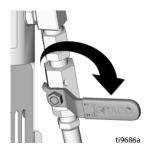

1. Place displacement pump in grounded metal pail partially filled with flushing fluid. Attach ground wire to pail and to earth ground.

 Turn prime valve down to DRAIN position. Turn pressure control counterclockwise to lowest pressure.

3. Set hydraulic pump valve OFF.

- 4. Start a gasoline engine, see step 5. Start a Diesel engine, see step 6.
- 5. Start gasoline engine:
  - a. Move fuel valve to open.

b. Move choke to closed.

c. Set throttle to fast.

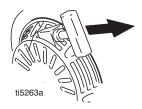

d. Set engine switch to ON.

# Startup (Internal Combustion Models)

e. Pull starter rope.

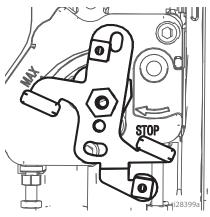

f. After engine starts, move choke to open.

g. Set throttle to desired setting.

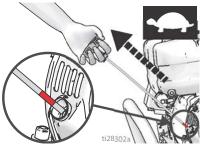

- 6. Start Diesel engine:
  - a. Move throttle lever to MIN position.

b. Grip the starter rope handle. Gently pull the rope until it is extended to

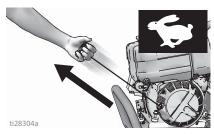

the full length revealing the RED indicator mark on the rope.

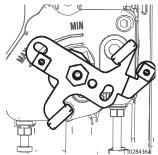

c. Without releasing the starter rope handle allow the rope to rewind completely.

d. Start the engine by pulling the rope using a firm steady pull.

e. After engine starts move throttle lever to MAX (full throttle) position.

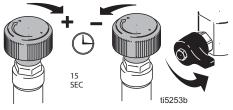

# Startup (Internal Combustion Models)

Set hydraulic pump valve ON (hydraulic motor is now active).

 Increase pressure enough to start hydraulic motor stroking and allow fluid to circulate for 15 seconds; turn pressure down, turn prime valve horizontal.

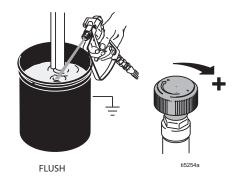

9. Disengage spray gun trigger lock.

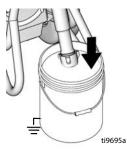

10. Hold gun against grounded metal flushing pail. Trigger gun and increase fluid pressure slowly until pump runs smoothly. Release trigger and allow sprayer to build pressure. Engage trigger lock.

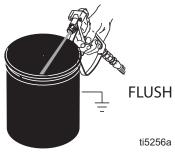

High-pressure spray is able to inject toxins into the body and cause serious bodily injury. Do not stop leaks with hand or rag.

- 11. Inspect for leaks. If leaks occur, turn sprayer OFF immediately. Perform **Pressure Relief Procedure**, page 15. Tighten leaky fittings. Repeat **Startup** procedure steps 2-8. If no leaks, continue to trigger gun until system is thoroughly flushed.
- 12. Place siphon tube in paint pail.

13. Trigger gun again into flushing fluid pail until paint appears.

14. Assemble Tip and Guard, page 24.

# Startup (Electric Models)

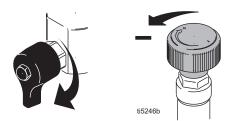

# Startup (Electric Models)

 Place displacement pump in grounded metal pail partially filled with flushing fluid. Attach ground wire to pail and to earth ground.

 Turn prime valve down. Turn pressure control counterclockwise to lowest pressure.

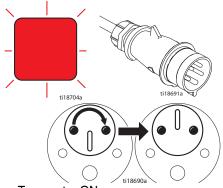

3. Set hydraulic pump valve OFF.

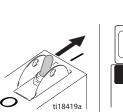

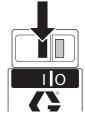

4. Plug cord into outlet.

For three phase electric motors: If red phase sequence light is on, remove plug from outlet and turn phase sequence screw 180°.

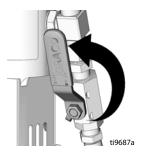

5. Turn motor ON.

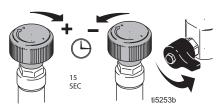

6. Set hydraulic pump valve ON (hydraulic motor is now active).

# Startup (Electric Models)

 Increase pressure enough to start hydraulic motor stroking and allow fluid to circulate for 15 seconds; turn pressure down, turn prime valve horizontal.

8. Take spray gun trigger safety OFF.

 Hold gun against grounded metal flushing pail. Trigger gun and increase fluid pressure slowly until pump runs smoothly.

High-pressure spray is able to inject toxins into the body and cause serious bodily injury. Do not stop leaks with hand or rag.

- Inspect fittings for leaks. If leaks occur, turn sprayer OFF immediately. Perform Pressure Relief Procedure, page 15. Tighten leaky fittings. Repeat Startup procedure steps 2-8. If no leaks, continue to trigger gun until system is thoroughly flushed.
- 11. Place displacement pump in paint pail.

12. Trigger gun again into flushing fluid pail until paint appears.

13. Assemble Tip and Guard, page 24.

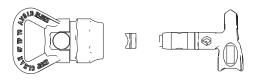

### How to Spray

# How to Spray

#### Switch Tip<sup>™</sup> and Guard Assembly

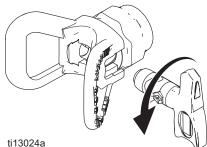

- 1. Perform **Pressure Relief Procedure**, page 15.
- Engage gun trigger lock. Insert Switch Tip. Insert seat and OneSeal<sup>™</sup>.

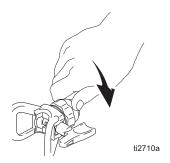

ti13023a

3. Insert Switch Tip and face forward.

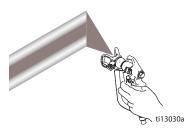

.....

4. Screw assembly onto gun. Tighten.

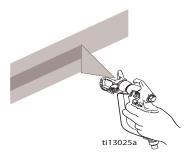

#### Spray

 Spray test pattern. Increase pressure to eliminate heavy edges. Use smaller tip size if pressure adjustment can not eliminate heavy edges.

 Hold gun perpendicular, 10-12 in. (25-30 cm) from surface. Spray back and forth. Overlap by 50%. Trigger gun after moving and release before stopping.

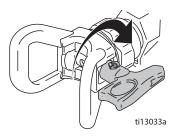

# How to Spray

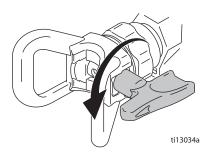

#### **Clear Tip Clogs**

1. Release trigger, engage trigger lock. Rotate Switch Tip. Disengage trigger lock. Trigger gun to clear clog.

2. Engage trigger lock. Return Switch Tip to original position. Disengage trigger lock and continue spraying.

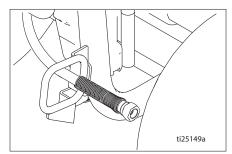

#### Hose Reel

#### (ProContractor Series only)

To avoid injury, keep your head clear of hose reel while winding up hose.

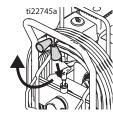

1. Make sure hose is routed through hose guide.

2. Lift and turn pivot lock 90° to unlock hose reel. Pull on hose to remove it from hose reel.

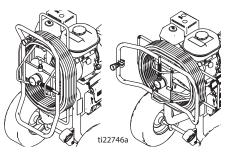

3. Pull reel handle down and turn clockwise to reel in hose.

4. **NOTE:** The hose reel can be locked into two positions: Usage and Storage.

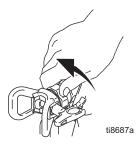

### **Clean Up**

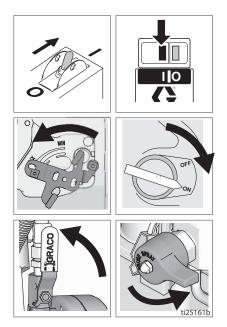

- 1. Perform **Pressure Relief Procedure**, page 15.
- 2. Remove Guard and SwitchTip.

3. Remove displacement pump from paint and place in flushing fluid. Use water for water-based paint and mineral spirits for oil based paint.

 Turn motor switch ON or turn engine ON and start engine. Turn hydraulic pump valve ON. Turn prime valve forward to SPRAY position.

 Hold gun against pail. Disengage trigger lock. Turn pressure control up until motor begins to drive pump. Trigger gun until flushing fluid appears.

Clean Up

 Move gun to waste pail, hold gun against pail, trigger gun to thoroughly flush system. Release trigger and engage trigger lock.

 While continuing to trigger gun, turn prime valve down. Then release gun trigger. Allow flushing fluid to circulate until fluid comes out of drain tube clear.

 Raise displacement pump above flushing fluid and run sprayer for 15 to 30 seconds to drain fluid. Turn hydraulic valve OFF. Turn engine OFF or turn electric motor OFF and unplug.

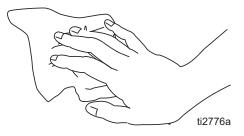

9. Engage trigger lock. Remove filters from gun and sprayer, if installed. Clean and inspect. Reinstall filters.

10. Unscrew and remove inlet strainer. Clean and replace strainer if necessary.

- 11. If flushing with water, flush again with mineral spirits, or Pump Armor, to leave a protective coating to prevent freezing or corrosion.
- 12. Wipe sprayer, hose and gun with a rag soaked in water or mineral spirits.

### Maintenance

**NOTE:** For detailed engine maintenance and specifications, refer to separate Honda or Kohler Engine Owner's Manual, supplied.

**DAILY:** Check engine oil level and fill as necessary.

**DAILY:** Check hydraulic oil level and fill as necessary.

DAILY: Check hose for wear and damage.

**DAILY:** Check gun trigger lock for proper operation.

**DAILY:** Check prime/drain valve for proper operation.

DAILY: Check and fill the fuel tank.

**DAILY:** Check that displacement pump is tight.

**DAILY:** Check level of Throat Seal Liquid (TSL) in displacement pump packing nut. Fill nut, if necessary. Keep TSL in nut to help prevent fluid buildup on piston rod and premature wear of packings and pump corrosion.

GASOLINE ENGINE, AFTER THE FIRST 20 HOURS OF OPERATION: Drain engine oil and refill with clean oil. Reference Honda Engine Owner's Manual for correct oil grade.

#### DIESEL ENGINE, AFTER THE FIRST 50

HOURS OF OPERATION: Drain engine oil and refill with clean oil. Replace oil filter. Reference Kohler Engine Owner's Manual for correct oil grade.

**WEEKLY:** Remove engine air filter cover and clean element. Replace element, if necessary. If operating in an unusually dusty environment: check filter daily and replace, if necessary.

Replacement elements can be purchased from your local HONDA/Kohler dealer.

**WEEKLY/DAILY:** Remove any debris or media from hydraulic rod.

#### AFTER EACH 100 HOURS OF

**OPERATION:** Change engine oil. Reference Honda Engines Owner's Manual for correct oil viscosity.

#### DIESEL ENGINE, AFTER EACH 250

HOURS OF OPERATION: Drain engine oil and refill with clean oil. Replace oil filter. Reference Kohler Engine Owner's Manual for correct oil grade.

**SEMI-ANNUALLY:** Check belt wear. Replace if necessary.

AFTER EACH 500 HOURS OR 3 MONTHS OF OPERATION: Replace hydraulic oil and filter with Graco hydraulic oil 169236 (5 gallon/20 liter) or 207428 (1 gallon/3.8 liter) and filter 246173. Oil change interval dependent on environmental conditions.

YEARLY OR 2000 HOURS: Replace belt.

**SPARK PLUG:** Use only BPR6ES (NGK) or W20EPR-U (NIPPONDENSO) plug. Gap plug to 0.028 to 0.031 in. (0.7 to 0.8 mm). use spark plug wrench when installing and removing plug.

# Troubleshooting

### Troubleshooting

| Problem  | Cause   | Solution   |
|--|---|--|
| Internal combustion engine pulls hard (won't start)          | Hydraulic pressure is too high                                    | Turn hydraulic pressure knob<br>counterclockwise to lowest<br>setting  |
| Gasoline engine does not start                               | Switch OFF, low oil, no gasoline                                  | Consult engine manual  |
|  | Fuel shut off valve closed  | Open fuel shut off valve   |
| Gasoline engine does not work properly                       | Faulty engine   | Consult engine manual  |
|  | Elevation   | Refer to Engine Repair Kit, 4.0<br>hp - 288678 / 5.5 hp - 248943 /<br>6/5 hp - 248944 / 9.0 hp -<br>248945         |
| Diesel engine does not start                                 | No fuel<br>Incorrect injection timing, rings<br>worn or sticking. | Consult engine manuals   |
| Diesel engine does not work<br>properly                      | Faulty engine   | Consult engine manuals   |
|  | Poor fuel quality   | Drain fuel tank and replace fuel with good clean fuel  |
| Internal combustion engine                                   | Hydraulic pump valve is OFF                                       | Set hydraulic pump valve ON  |
| operates, but displacement<br>pump does not operate          | Pressure setting too low  | Increase pressure, page 18   |
|  | Displacement pump outlet filter<br>(if used) is dirty or clogged  | Clean the filter   |
|  | Tip or tip filter (if used) is<br>clogged                         | Remove tip and/or filter and clean   |
|  | Hydraulic fluid too low   | Shut off sprayer. Add fluid*. See page 16  |
|  | Belt worn or broken or off  | Replace.   |
|  | Hydraulic pump worn or<br>damaged                                 | Bring sprayer to Graco<br>distributor for repair   |
|  | Dried paint seized paint pump rod                                 | Service pump. See manual<br>334654   |
|  | Hydraulic motor not shifting                                      | Set pump valve OFF. Turn<br>pressure down. Turn engine<br>OFF. Pry rod up or down until<br>hydraulic motor shifts. |
| Displacement pump operates,<br>but output is low on upstroke | Piston ball check not seating<br>properly                         | Service piston ball check. See manual 334654   |
|  | Piston packings worn or<br>damaged                                | Replace packings. See manual 334654  |

# Troubleshooting

| Problem  | Cause  | Solution   |  |
|--|--|--|--|
| Displacement pump operates,<br>but output is low on down stroke<br>and/or on both strokes                      | Piston packings worn or<br>damaged                               | Tighten packing nut or replace packings. See manual 334654                       |  |
|  | Intake valve ball check not<br>seating properly                  | Service intake valve ball check.<br>See manual 334654                            |  |
|  | Suction tube air leak  |  |  |
|  | Hydraulic oil filter is dirty                                    | Replace filter.  |  |
| Paint leaks and runs over side of wet cup  | Loose wet cup  | Tighten wet cup enough to stop<br>leakage  |  |
|  | Throat packings worn or<br>damaged                               | Replace packings. See manual 334654  |  |
| Excessive leakage around<br>hydraulic motor piston rod wiper   | Piston rod seal worn or<br>damaged                               | Replace these parts. See manual 334654   |  |
| Fluid delivery is low  | Pressure setting too low   | Increase pressure, page 18   |  |
|  | Displacement pump outlet filter<br>(if used) is dirty or clogged | Clean or replace.  |  |
|  | Contractor gun filter (if used) is<br>dirty or clogged           | Clean or replace.  |  |
|  | Intake line to pump inlet is not tight                           | Tighten.   |  |
|  | Hydraulic motor is worn or<br>damaged                            | Bring sprayer to Graco distributor for repair.                                   |  |
|  | Large pressure drop in fluid<br>hose                             | Reduce length or increase diameter.  |  |
| The sprayer overheats  | Paint buildup on hydraulic<br>components                         | Clean  |  |
|  | Oil level is low   | Fill with oil. See page 16   |  |
| Spitting from gun  | Air in fluid pump or hose  | Check for loose connections on<br>siphon assembly, tighten, then<br>reprime pump |  |
|  | Loose intake suction   | Tighten  |  |
|  | Fluid supply is low or empty                                     | Refill supply container  |  |
| Pump noise   | Low hydraulic fluid level  | Turn sprayer OFF. Add fluid*.<br>See page 16                                     |  |
| Electric motor does not operate  | Power switch is not ON   | Turn power switch ON   |  |
|  | Tripped circuit breaker  | Check circuit breaker at power source. Reset motor switch                        |  |
| *Check hydraulic fluid level often. Do no allow it to become too low. Use only Graco hydraulic fluid, page 16. |  |  |  |

# Standard Series Pump

### Standard Series Pump

#### Removal

See pump manual 334654 for pump repair.

- 1. Flush pump.
- 2. Perform **Pressure Relief Procedure**, page 15.
- 3. Remove strainer and paint hose.

4. Push retaining ring up; push out pin.

5. Loosen jam nut. Unscrew pump.

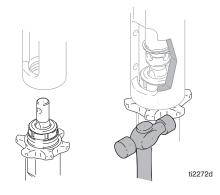

#### Installation

#### NOTICE

If pump jam nut loosens during operation, the threads of the bearing housing and drive train will be damaged. Tighten jam nut as specified.

 Screw jam nut to bottom of pump threads. Screw pump completely into manifold. Unscrew pump from manifold until pump outlet aligns with hose. Hand tighten jam nut, then tap 1/8 to 1/4 turn with hammer.

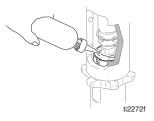

If pin is loose, parts could break off and project through the air, resulting in serious injury or property damage. Make sure pin is properly installed.

# ProContractor Series Pump

2. Slowly pull engine starter rope until pump rod pin hole is aligned with hydraulic rod hole. Push pin into hole. Push retaining ring into groove.

3. Fill packing nut with Graco TSL.

### ProContractor Series Pump

#### Removal

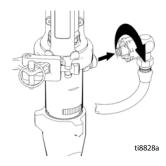

See pump manual 334654 for pump repair.

- 1. Flush pump.
- 2. Perform Pressure Relief Procedure, page 15.

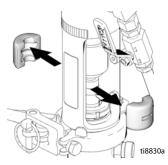

3. Remove paint hose fitting and paint hose from pump fitting.

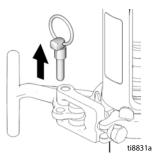

# ProContractor Series Pump

- 4. Slide coupler cover up to fully expose rod couplers.
  - ti8829a
- 5. Remove rod couplers.

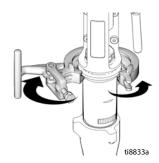

6. Remove pin.

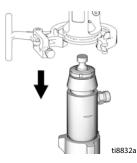

**NOTE:** Support pump with your hand before opening t-handle.

7. Open clamp.

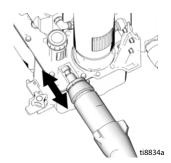

8. Remove pump from unit.

#### Installation

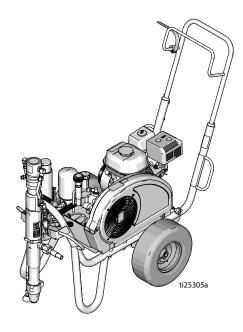

1. If needed, place pump rod in adjustment casting and pull pump to extend rod.

2. Reverse removal steps to reassemble pump.

Maximum back fuse rating for EH300DI:

Fuse type aM: 63A Fuse type gL: 80 A

Fuse type gL: 80 A

**NOTE:** Under voltage release coil in motor starter for EH300DI will not energize if voltage is less than 85% of listed voltage in Technical Data table.

Under voltage release coil in motor starter for EH300DI will de-energize and sprayer will stop if voltage drops to 85% of rated nominal voltage. Voltage will need to be increased and sprayer will need to be restarted.

**NOTE:** To operate the EH300DI (24M056) sprayer with a generator, the generator must be sized for 5 kW output (minimum).

# Graco Standard Warranty

# **Graco Standard Warranty**

Graco warrants all equipment referenced in this document which is manufactured by Graco and bearing its name to be free from defects in material and workmanship on the date of sale to the original purchaser for use. With the exception of any special, extended, or limited warranty published by Graco, Graco will, for a period of twelve months from the date of sale, repair or replace any part of the equipment determined by Graco to be defective. This warranty applies only when the equipment is installed, operated and maintained in accordance with Graco's written recommendations.

This warranty does not cover, and Graco shall not be liable for general wear and tear, or any malfunction, damage or wear caused by faulty installation, misapplication, abrasion, corrosion, inadequate or improper maintenance, negligence, accident, tampering, or substitution of non-Graco component parts. Nor shall Graco be liable for malfunction, damage or wear caused by the incompatibility of Graco equipment with structures, accessories, equipment or materials not supplied by Graco, or the improper design, manufacture, installation, operation or maintenance of structures, accessories, equipment or materials not supplied by Graco.

This warranty is conditioned upon the prepaid return of the equipment claimed to be defective to an authorized Graco distributor for verification of the claimed defect. If the claimed defect is verified, Graco will repair or replace free of charge any defective parts. The equipment will be returned to the original purchaser transportation prepaid. If inspection of the equipment does not disclose any defect in material or workmanship, repairs will be made at a reasonable charge, which charges may include the costs of parts, labor, and transportation.

# THIS WARRANTY IS EXCLUSIVE, AND IS IN LIEU OF ANY OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTY OF MERCHANTABILITY OR WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE.

Graco's sole obligation and buyer's sole remedy for any breach of warranty shall be as set forth above. The buyer agrees that no other remedy (including, but not limited to, incidental or consequential damages for lost profits, lost sales, injury to person or property, or any other incidental or consequential loss) shall be available. Any action for breach of warranty must be brought within two (2) years of the date of sale.

#### GRACO MAKES NO WARRANTY, AND DISCLAIMS ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, IN CONNECTION WITH ACCESSORIES, EQUIPMENT, MATERIALS OR COMPONENTS SOLD BUT NOT MANUFACTURED

**BY GRACO**. These items sold, but not manufactured by Graco (such as electric motors, switches, hose, etc.), are subject to the warranty, if any, of their manufacturer. Graco will provide purchaser with reasonable assistance in making any claim for breach of these warranties.

In no event will Graco be liable for indirect, incidental, special or consequential damages resulting from Graco supplying equipment hereunder, or the furnishing, performance, or use of any products or other goods sold hereto, whether due to a breach of contract, breach of warranty, the negligence of Graco, or otherwise.

#### FOR GRACO CANADA CUSTOMERS

The Parties acknowledge that they have required that the present document, as well as all documents, notices and legal proceedings entered into, given or instituted pursuant hereto or relating directly or indirectly hereto, be drawn up in English. Les parties reconnaissent avoir convenu que la rédaction du présente document sera en Anglais, ainsi que tous documents, avis et procédures judiciaires exécutés, donnés ou intentés, à la suite de ou en rapport, directement ou indirectement, avec les procédures concernées.
